PHARMACOVIGILANCE CELL

VISION

The vision of a pharmacovigilance cell is to ensure safe and rational use of medicines by monitoring, assessing, and preventing adverse drug reactions (ADRs) to improve patient safety and public health.

Key points

- Promote drug safety and patient protection
- Build a strong ADR monitoring system
- Support safe use of medicines in healthcare

Mission

The mission is to detect, assess, understand, and prevent adverse effects or any other drug-related problems.

Main missions

- Collect and analyze adverse drug reaction reports.
- Increase awareness among healthcare professionals.
- Promote rational drug use.
- Strengthen the national pharmacovigilance program

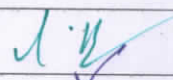

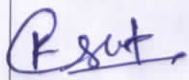

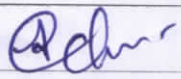

Objectives

1. Monitoring drug safety
2. ADR reporting system
3. Risk assessment
4. Data collection and analysis
5. Awareness and training
6. Communication
7. Support national programmes.

Organization Structure

The pharmacovigilance cell will be headed by a coordinator, who will report to the Principal of the institution.

The composition of Pharmacovigilance Cell
